

Telecare Plus — Tenant Operator Guide

A step-by-step walkthrough of every screen in your Telecare Plus admin dashboard. Use it when you set up a new clinic, train a new team member, or look up how a specific page works.

What Telecare Plus is for. Telecare Plus runs both **online consultations** (video, voice, or chat) and **in-person appointments** at your clinic. This dashboard is where you set up your clinics and doctors, watch appointments coming in, send invoices, run promotions, and pay your team. The patient app and the doctor app handle the actual visits and calls; this dashboard is the back office.

- Banners

12. Team Administration

- Users

13. Forgot your password?

14. Quick tips

1. Signing in

- Open <https://telecare.codelines.sa/system> in your browser (this is the same address for every Telecare Plus customer).
- Type your **email** and **password**, then click **Sign in**.
- The globe icon in the top right switches the dashboard between English and العربية. Everything — menus, labels, buttons — translates instantly, and Arabic flips the layout right-to-left automatically.

- Forgot your password? Click **Forgot Password?** under the form. See [section 13](#).
- After you reset your password, you'll see a green confirmation banner the next time you sign in.

2. Choosing your clinic

If your account is linked to more than one clinic group (e.g. you manage several brands), this screen appears right after sign-in.

- Each card shows the **clinic name**, an **ID**, your **role** (badge in yellow / red / blue), and the **medical centers** you can see.
- Type into the **search box** to filter the list when you have many entries.
- Click **Select** on the clinic you want to work in. The dashboard reloads with that clinic's data.
- **Back to login** signs you out and returns to the sign-in screen.

Once selected, your clinic is remembered for the rest of your session. To switch later, use the dropdown at the **top-right of every page**.

Create a Clinic

Add a Doctor

Set Up Rank Pricing

A new clinic always lands here first. The checklist walks you through the eight things that have to be in place before patients can book an appointment.

Telecare Plus — Tenant Operator Guide

4

Order	Step	What you fill in
1	Medical Center	English + Arabic name, MOH license, contact details, address
2	Clinic Type	"General", "Dermatology", "Cardiology"... the broad category
3	Speciality	Specific specialities each doctor practices
4	Doctor Level	Consultant, Specialist, GP — the seniority tiers you charge for
5	Consultation Type	Video, Voice, Chat, or In-person — how patients can meet doctors
6	Clinic	A real clinic = clinic type + medical center
7	Doctor	Each practitioner with their name, gender, clinic, level, speciality
8	Price	How much each (level × clinic × consultation type) costs

- The **progress bar** at the top shows how many of the eight steps are done (e.g. "3 / 8").
- **Save and Continue** moves to the next step. **Save and Add Another** lets you add several entries in a row (multiple doctors, multiple prices...).
- **Skip** lets you come back later — every step has its own page in the sidebar.
- **View** opens the full list for that section so you can double-check what you've entered.
- When every required step is done, a success card appears with a **Go to Dashboard** button.

You can revisit the checklist any time from **Getting Started** in the left sidebar.

Appointment Breakdown

Your daily homepage. Numbers update live as your team and your patients use the system.

Reading the page from top to bottom:

1. **Clinic Overview** — three big clickable cards: total **Patients**, **Doctors**, and **Appointments**. Click any of them to open that full list.
2. **All Appointments** — today versus all-time, broken into **Upcoming / Ongoing / Completed / Canceled** so you can see how today is shaping up.

3. **Finance & Payments** — four cards (**Total Billed**, **Collected**, **Pending**, **Canceled**) followed by a list of recent payments. The **View All Transactions** link jumps to the payouts page.
 4. **Appointment Insights** — two charts: a circular "rose" chart of status distribution, and a column chart for breakdown.
 5. **Appointments by Doctor** — a bar chart showing your top doctors. The **Today / This Week / This Month / Year to Date** buttons change the time window.
 6. **Top Performers** — leaderboards of your **Top Doctors** and **Top Patients** with gold / silver / bronze badges. Click a row to open that person's profile.
-

5. Doctors & Staff

5.1 Doctors

The screenshot shows the TeleCare+ interface for managing doctors. The top bar includes the app URL, language selector (العربية), version (rashed2-old-version), and a switch button. The left sidebar contains navigation options: Getting Started, Analytics, Doctors & Staff (selected), and a list of other modules like Clinics & Centers, Patients & Encounters, etc. The main content area is titled 'Doctors' and features a search bar and a table of doctor records.

ID	Name	Email	Gender	Clinic Type	Rank	Status	NPHIES	Actions
382	Dr Rashed Dr Rashed	rashedtest1111@gmail.com	Female	General Clinic عيادة عامة	Specialist	active	01.01	    

The full list of practitioners. Each row shows the doctor's ID, name (English + Arabic), email, gender, clinic type, level, status, and a flag for whether their insurance code is filled in.

- Use the small dropdowns on the column headers to **filter by gender** or **status** (Active / Inactive).
- The buttons at the end of each row do the following:
 - **Eye icon** — view the doctor's full profile.
 - **Pencil icon** — edit their details.
 - **Trash icon** — remove them (you'll be asked to confirm).
 -  **Calendar icon** — set their **working hours** (when they're available for appointments).
 -  **Suitcase / palm icon** — set their **vacation days** (when they're unavailable).
- A small  icon next to a doctor means an **insurance code (NPHIES practice code) is missing**. Insurance claims won't go through without it.

- **Clinic type** — pick from the list you created during setup.
- **Medical center** — the parent facility.
- **Insurance specialty code** — used when sending claims.
- **Contact number** — for patients and partners.

The buttons on each row let you **view**, **edit**, or **delete** the clinic.

6.2 Medical Centers

The screenshot shows the TeleCare+ web application interface for managing medical centers. The top header includes the app URL 'rashed2-old-version.telecare.codelines.sa', a language selector for 'العربية', and a version indicator 'rashed2-old-version' with a 'Switch' button. The left sidebar contains a navigation menu with options: Getting Started, Analytics, Doctors & Staff, Clinics & Centers (selected), Clinics, Medical Centers (highlighted), Patients & Encounters, Pricing & Ranks, Integrations, Financial, Marketing, Administration, and a Logout button. The main content area is titled 'Medical Centers' and features a search bar. Below the search bar is a table with the following data:

ID	Name	Address	Contact	MOH License	Status	Actions
186	Dr Rashed medical service Dr Rashed medical service	Asia	+966557672290	mock_1774590449102	active	

At the bottom right of the table, there is a pagination control showing '1' in a blue box, with arrows for navigation.

The top-level facilities under your account — usually one per branch / city.

- The list shows the bilingual name, address, contact, MOH license number, and status.
- Edit a center to update its name (English + Arabic), address, MOH license, official phone, official email, website, logo, **digital stamp** (used on printed prescriptions and lab orders), location, and status.

The **MOH license** and **digital stamp** are what make your prescriptions and reports official — they appear on every PDF the clinic produces, whether the visit was online or in-person. Keep both up to date.

Every booking — past, present, and future. The list shows ID, patient name, doctor name, the number of clinical notes on file, start time, and whether it's canceled.

- Filter by patient, doctor, or status (Confirmed / Canceled) using the column dropdowns. The top **search** finds appointments by patient or doctor name.
- **+ Add Appointment** opens a window where you can pick an available doctor and book a slot on their calendar on the patient's behalf.
- Click an appointment to open its **details page**. From there you can:
 - **View Booking Details** — see the full booking record.
 - **Reschedule** — open the doctor's calendar pre-set to this appointment so you can pick a new slot.
 - **Cancel Booking** — type a reason and confirm.
 - **Prescriptions** and **Lab Investigations** tabs — see what the doctor prescribed or ordered during this appointment.

Online consultations: the patient and the doctor join the call from their own mobile apps — the dashboard isn't used for the call itself, only for booking and follow-up.

In-person appointments: the patient comes to your clinic at the scheduled slot. Use the dashboard to confirm the booking, reschedule if needed, and review what the doctor recorded afterwards.

- **Doctor Level, Clinic, Consultation Type** — pick from the dropdowns.
- **Price** in your currency.
- **Duration (minutes)** — how long the slot is. This sets the appointment length on the doctor's calendar.
- **Description** — what the patient sees next to the price in the booking app.

Some clinics are set up so the patient just picks the cheapest available doctor (without choosing a level). On those clinics the **Doctor Level** field is hidden — the system picks automatically.

9. Integrations

These two pages let you configure parts of the booking platform that power your patient and doctor apps. The first time you open one, give it a few seconds to load.

9.1 Apps

The screenshot shows the 'Apps' management page in the TeleCare+ system. The interface includes a sidebar on the left with navigation options: Getting Started, Analytics, Doctors & Staff, Clinics & Centers, Patients & Encounters, Pricing & Ranks, Integrations (expanded), Apps (selected), Messages, Financial, Marketing, Administration, and Logout. The main content area is titled 'Activated All apps' and displays three app cards: WhatsApp, Email, and Custom Domain. Each card shows the app icon, name, status (Activated), description, and buttons for Setup and Details. The WhatsApp card description is 'Send reminders and alerts for booking statuses'. The Email card description is 'Send reminders and alerts for booking statuses'. The Custom Domain card description is 'Your own address on the internet'. The top of the page shows the App URL as 'rashed2-old-version.telecare.codelines.sa' and a language selector for 'العربية'.

Turn on or off the **add-ons** that extend your clinic — for example payment providers, notification channels, or custom integrations.

Doctor Payouts

Manage payout transactions for doctors – create payment periods, review totals, execute payments, and export reports.

+ Create Status

ID	Period Start Date	Period End Date	Total	Total Before Cut	Status	Actions
No data						

Batch payments to your doctors. Each row is one payout for a date range.

- Columns: ID, period start, period end, total, total before your cut, status.
- **Status** is one of Draft, Processing, Completed, Failed, or Cancelled. Use the filter to narrow down. Click **Load More** for older batches.
- **Create** opens a window where you pick the start and end dates and creates a **draft** payout.
- Click a row to open the details:
 - **Execute** — only available for draft batches; this actually sends the money.
 - **Cancel** — only available for draft batches.
 - **Export Excel** — completed batches can be exported as a spreadsheet.

10.4 Provider Settings

Provider ID	Display Name	Email	Phone	Bank Name	IBAN	Revenue %	Auto Payout	Actions
No data								

The payment setup for each doctor.

- Columns: ID, name, email, phone, bank name, IBAN, your revenue share, and whether payouts run automatically.
- Edit a row to set:
 - **Bank Full Name** and **IBAN** — where the money goes.
 - **Revenue Percentage** — the share each doctor takes home (between 0 and 1; for example **0.7** means **70%** to the doctor and **30%** to the clinic).
 - **Automated Payout** — turn on if you want payouts to fire automatically at the end of each period.

Doctors appear here automatically once you've added them; you don't add or remove entries from this page directly.

11. Marketing

11.1 Coupons

Create discount codes — set the amount, the dates they're valid, and which clinics or services they apply to.

11.2 Banners

The screenshot shows the TeleCare+ web application interface for managing banners. The top header includes the app URL 'rashed2-old-version.telecare.codelines.sa', a language selector for 'العربية', and a version switcher for 'rashed2-old-version'. The left sidebar contains a navigation menu with items like 'Getting Started', 'Analytics', 'Doctors & Staff', 'Clinics & Centers', 'Patients & Encounters', 'Pricing & Ranks', 'Integrations', 'Financial', 'Marketing' (selected), 'Coupons', 'Administration', and 'Logout'. The main content area is titled 'Banners' and features a 'Create' button. Below the title is a table with columns 'ID', 'Image', 'Created At', and 'Actions'. The table is currently empty, displaying a 'No data' message with a folder icon.

< 1 >

<

Your team — everyone who can sign into this dashboard.

- Columns: name, email, role, and the medical centers they can access.
- The top **search** finds people by name; the column filters narrow by email or role.
- Click the **eye icon** to see a user's full profile.

This page is **view only**. To invite a new admin or revoke an existing one, contact Codelines support. The roles you'll see are:

- **Owner (root_admin)** — full access across the whole clinic group.
- **Manager (super_admin)** — manages a group of medical centers.
- **Center admin (medical_center_admin)** — limited to one specific medical center.

13. Forgot your password?

Step 1 — Request a reset link

- From the sign-in page, click **Forgot Password?**.
- Type your email and submit. You'll see a confirmation message; an email with a reset link will arrive in your inbox.

Step 2 — Set a new password

- Open the link in your email — it takes you to a page with two boxes: **new password** and **confirm**.
- Pick a password at least **6 characters** long, type it twice, and submit.
- You'll be sent back to the sign-in page with a green confirmation banner.

If the link in your email says "invalid token", request a new one from the Forgot Password page.

14. Quick tips

- **English ↔ Arabic anywhere.** The globe icon in the top-right switches the whole dashboard between languages and flips the layout for Arabic.
- **Switch between clinics.** The dropdown at the top-right of every page lists the clinics your account can access.
- **Patient app URL.** The top of every page (left of the header) shows the public address of your patient-facing app, with a copy button next to it. Useful when training new staff or sharing the link with patients.
- **Unsaved changes.** If you edit something and try to leave the page without saving, the dashboard will ask you to confirm.
- **Where prescriptions and lab orders live.** They're not in the sidebar on their own — your doctors create them in their doctor app, and you'll find them on each Appointment's details page under the **Prescriptions** and **Lab Investigations** tabs. You can download them as PDFs from there.
- **Watch for the ⚠ icon.** It always means an insurance code is missing on a doctor or clinic. Fill it in before you submit claims.
- **Need help?** Contact Codelines support — they can adjust account access, add team members, or assist with anything you can't do from the dashboard yourself.
